For Immediate Release

CSCS Corp. Hires Peter Bonk, Ph.D. as Head of Chemistry
*Dr. Bonk to Lead and Manage CSCS's
New Green Chemistry Custom Chemical Lab and Kilo Plant*

RHODE ISLAND; Oct. 28, 2009 – CSCS Corporation has hired Peter J. Bonk, Ph.D. as Head of Chemistry. Dr. Bonk's charge is to lead the growth and management of CSCS' new custom chemical and pharmaceutical lab, which will apply green chemistry to the world of fine chemicals and pharmaceuticals, as well as manage CSCS' new kilogram (kilo) plant.

The CSCS custom chemical and pharmaceutical laboratory is currently in the planning stage. Under Dr. Bonk's tutelage, the lab, when complete, will specialize in reference standards, controlled substances, analytical development, and general research. In addition, the lab will apply green chemistry techniques and practices via new technology called "micro reactors" which cut down waste, speed up cycle times, and increase efficiencies.

The kilo plant will offer kilogram-sized equipment, allowing CSCS to fill larger orders than similar labs and plants of its kind are able to.

"This is a tremendous opportunity, and I'm thankful to become a part of the CSCS success story," says Dr. Bonk. "I look forward to making the pharmaceutical laboratory the first of its kind in the industry. With not only a green chemical lab but also a kilo plant, CSCS will be at the forefront of fine chemical and pharmaceutical production and sourcing."

"We're excited to have Peter join our team, and are lucky to have him lead the building and management of our new pharmaceutical lab," says Jim Peltier, CSCS's President and Owner. "I'm sure that with his knowledge and experience, CSCS will only benefit, and our lab and plant will be unmatched."

Prior to joining CSCS, Dr. Peter Bonk worked as Assistant Director, Research and Development at Rhodes Technologies, a subsidiary of Purdue Pharma. Dr. Bonk's experience in chemical research and development includes earlier posts at Abbott Laboratories, the Dow Chemical Company, and The Chrysler Corporation. A graduate of the University of Wisconsin-Madison with a Ph.D. in organic chemistry and a Bachelors of Science in Chemistry from the University of Michigan-Ann Arbor, Dr. Bonk is an author or co-author of nine publications, including one patent, as well as a seminar speaker at universities nationwide.
